

SENSORY GARDENS have great therapeutic advantages, from autism to dementia.

A sensory garden would be for all the community and appealing to all extremities of the community from youngest to the wisest.

The Ark Centre therapists already donate their time and knowledge, advising and helping special-needs pupils in state schools. Having experts on the doorstep could greatly benefit Broomfield primary school.

Just like government trend to centralise everything having the York Centre to support the field Park training centre is another facility creating more jobs for the trainees in an environment where the adults will understand the situation

The Ark Centre can either be self funding or a revenue stream or Essex County Council.

WOULD YOU SUPPROT A SENSORY GARDEN AT BROOMFIELD PLACE ?
